SIGHT FLOW INDICATORS

KENCO Engineering Company offers a variety of Standard KSF (cast body), Full-view, and Armored Sight Flow Indicators, as well as, a line of Sight Windows. All products are hydrostatically tested to ensure reliability in harsh operating conditions. KENCO Sight Flow Indicators provide a window into piping. They are a cost effective and efficient way to visually monitor the flow of fluids, and to determine if any problems exist along the process pipeline. These inexpensive, simple devices, allow operators to observe flow rate, direction, color and clarity. These indicators can be deployed in one of two ways: (1) individually at critical points along fluid lines where changes, interruptions or contamination is likely to occur, or (2) in groups where simultaneous monitoring of multiple fluid lines is necessary.

APPLICATIONS

One of the advantages of sight flow indicators is their application versatility. Common applications involve monitoring fluid flow through filter, cooling, and intake / outlet pumping lines, as well as numerous other industrial processes. In addition, sight flow indicators are useful as backups for meters, switches and other control devices.

INDUSTRIES SERVED

CHEMICAL / PETROCHEMICAL

Filter Line Monitoring
Distilling Operations
Dye / Ink Color
Paint / Varnish Consistency
Chemical Conversion Processes
General Refinery Piping

PETROLEUM

Drilling Pump Operations
Oil / Water Separation
Loading Terminals

OEM

Compressor Water Flow Solvent Recirculation Pre- and Post-Filter Trap Monitoring

POWER

Turbine Lubricant Flow Cooling Line Water Flow

WASTEWATER TREATMENT

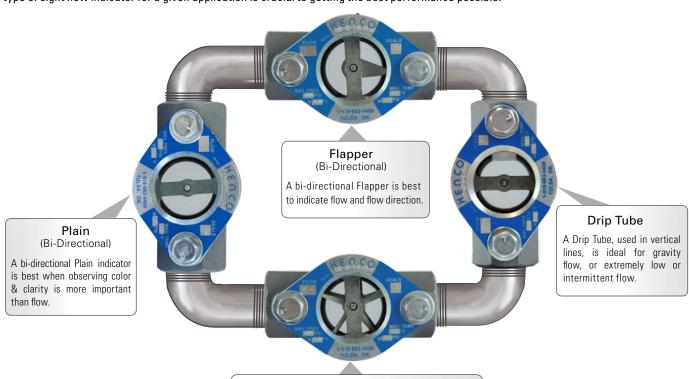

Second Stage Aeration Tank Pumping Lines

KSF CAST BODY SIGHT FLOW INDICATORS

KENCO offers a wide variety of Standard KSF (cast body) Sight Flow Indicators. They are available in a complete range of sizes and styles to meet your application needs.

Selecting The Best Style

Sight flow indicators are an inexpensive way to identify and repair process line problem areas reliably and efficiently. Selecting the best type of sight flow indicator for a given application is crucial to getting the best performance possible.

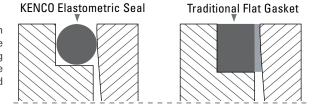

Rotor

A Rotor indicator is ideal for opaque liquids. Flow from left-to-right is standard. Specify if left-to-right flow is needed. Not recommended for flow rates above 100 GPM. A low-flow version is available for 1/4", 3/8", and 1/2" sizes.

LEAK-PROOF GUARANTEE

The most common complaint against sight flow indicators is that they leak. This is primarily caused by the failure of conventional flat seals. KENCO Standard KSF (cast body) Sight Flow Indicators are guaranteed not to leak for three full years under normal use. The reason we are sure that these indicators won't leak is the innovative radial sealing design:

Elastomeric radial seal with memory retention for shape creates a steady sealing force between the outside diameter of the glass and the indicator body.

A flat gasket will eventually compress, leaving a potential leak path (see light grey area to the left, between the gasket (blue) and sealing surface (hatched)).

MODULAR DESIGN

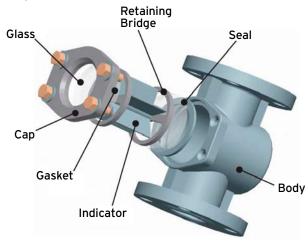

KENCO Modular Design

Competitor Tie-Rod Design

KENCO's unique modular design fastens the flow assembly directly to the body with no special torquing sequence. This provides easy access to the unit from the front side, which eliminates clearance problems caused by the Tie-Rod design. The Tie-Rod design also presents challenges fastening the glass and seal to the body.

The KENCO modular design allows for maintenance to the internal parts of the indicator without removing the indicator from the pipeline. This optimizes uptime and reduces replacement costs.

Pressure / Temperature Ratings (Standard Seals)

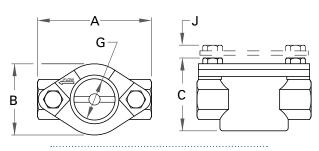

KSF	Max. Pressure	Max Temperature
ST Series (1/4" - 4")	150psig @ 150°F	150°F @ 150psig
ST Series (6" - 12")	200psig @ 150°F	250°F @ 135psig
HT Series (Threaded)	400psig @ 150°F	350°F @ 200psig
HT Series (Flanged) Carbon Steel	285psig @ 100°F	350°F @ 215psig
HT Series (Flanged) 316SS	275psig @ 100°F	350°F @ 205psig
HT Series (Flanged) Ductile Iron	245psig @ 100°F	350°F @ 165psig

Seal/Indicator Material Temperature Ratings

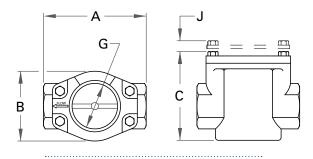

Seal Material	Temperature
Neoprene (ST Series Std.)	-20° to 250°F
Viton® (HT Series Std.)	0° to 350°F
Buna-N	-30° to 250°F
EPT	-20° to 250°F
Teflon®	-40° to 450°F
Kalrez®	0° to 500°F

DIMENSION MATCHING

KENCO Flanged Sight Flow Indicators are available in a version that matches the end-to-end dimension of sight flow indicators from Penberthy and Jacoby-Tarbox. The Model KPJ indicators are available in either Carbon Steel or 316SS materials, and Standard and High Pressure / High Temperature styles. All sizes are dimensionally interchangeable with these manufacturers' indicators, except 3/4", 2", 3", and 4" sizes, as noted in the table below.

FULL VIEW & ARMORED SIGHT FLOW INDICATORS

KENCO Full View Sight Flow Indicators provide for the maximum viewing area of all types of flow indicators. The open design allows 360° inspection of the fluid being observed. Available in NPT Threaded and Flanged models, these sight flow indicators are designed to enhance the visibility of the media as it passes through the glass cylinder. Full View Indicators are recommended for low pressure applications where maximum visibility is needed. They are best suited for vertically mounted applications.

KENCO Armored Sight Flow Indicators provide the best mix between visibility and protection. The additional shielding provides protection, while still maintaining maximum visibility. These units can be mounted either vertically or horizontally. The body of the Flanged Armored Indicator is not a wetted part. Only the glass and the Teflon® flange facing are in contact with the process media.
